CAN-BUS adapter  
Mazda3 Project

1.0

2010

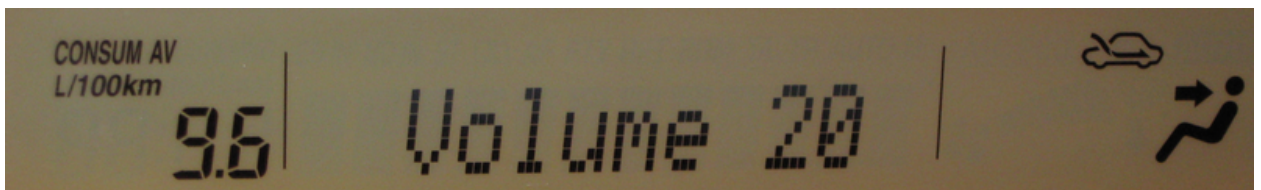

When you turn on your car with the key, on the screen appear the screensaver “nTray”,

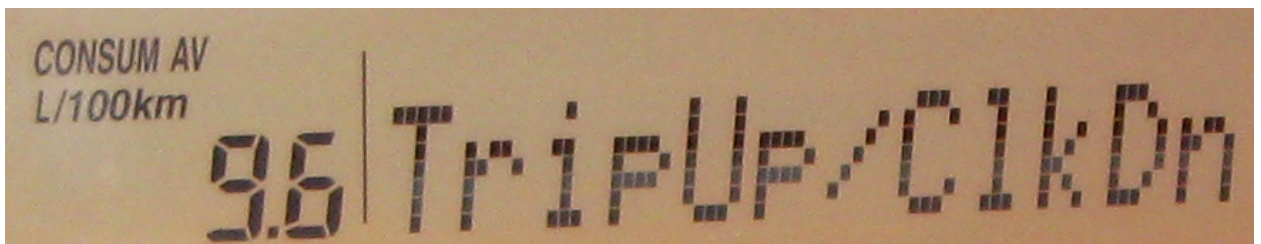

After switch of the radio recorder, the screen changed to the mode, which you have selected (radio, juke box and so on.)

You can control the radio recorder crossing the button of the wheel.

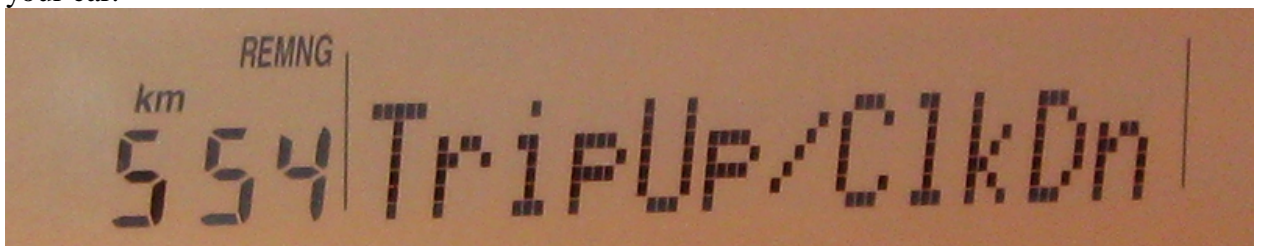

Pressing the button of the wheel “MODE” more then 3 seconds you can change the mode to the clock and trip computer. When your car dvd is turned on, on a car screen will show help for control clock and trip computer.

If you not press the button of the wheel more than 3 seconds, the module turn back to the mode of radio recorder.

You can control the clock and trip computer with the button Tr+ (switching the next track) and Tr- (switching the previous track).

Crossing the button Tr+ (when your car engine turned on) you can change the trip computer of your car.

Crossing the button Tr- you can change the mode to the clock. You can adjust time with the button of the wheel. After that, you have the time adjusted, do not forget to press the button Tr - , to stop the time blinking.
